Continuation Sh t (PTOL-303) 09/665,452

Continuation of 5. does NOT place the application in condition for allowance because: Refering to the specification page 16, lines 4+ "Flow intensity" means a volumetric flowrate per unit time. Review of the claim language does not indicate the first fluid flow or the second fluid flow as being simultaneous. That is the fluid flows claimed need not occur together. The first fluid flow could occur a minute, day, week, etc. prior to the second fluid flow. As claimed the fluid flows do not need to be together. Thus, thus the article can be transferred from the first vessel to the second vessel with having a first fluid flow and the article can be transferred back from the second vessel to the first vessel having a second fluid flow. Both the first and second fluid flows would then be maintained

With regard to the proposed amendment, in applicant's arguments, to the independent claim unless formally submitted the amendment will not be considered or addressed.
